Q: How to attach gif on textfield in iOS? How to attach gif on UITextField? A: Let's say you want to attach the following image to the textfield when the user taps it: Here's how we do it: First we need to make sure we have a UITextField in the storyboard. Then we do the following code in our viewDidLoad: UIGraphicsBeginImageContextWithOptions(self.myTextField.frame.size, YES, 0.0); [self.myTextField.layer renderInContext:UIGraphicsGetCurrentContext()]; UIImage *texture = UIGraphicsGetImageFromCurrentImageContext(); UIGraphicsEndImageContext(); You can just replace self.myTextField with your textfield name that you want to add the image. We just saved the image to the imageView, and the size of it is the size of your textField. Now we want to attach that image to our textfield. UITextField *myTextField = [[UITextField alloc] initWithFrame:CGRectMake(0, 0, self.view.frame.size.width, 21)]; //... add your textfield to the main view.... [myTextField setImage:[UIImage imageNamed:@"customer_btn.png"] forState:UIControlStateNormal];
