Hyper Fighters: First Contact is a fast-paced, addictive, and easy to learn shooter. It features a blend of arcade gameplay, deadly bosses, and endless action. Fourteen ultra modern story-based missions will have you flying, diving, and shooting your way through a host of amazing enemies and environments. Enter the world of Hyper Fighters: First Contact and own the highest scores in the world: Get them while you can! Blacksmith joins the Xbox LIVE Arcade for the very first time and allows players to forge their very own swords, then use them to attack monsters, tools, and each other in this fast-paced arcade-style action game. Blacksmith features three levels of play, each a completely separate and standalone game, but combined together for a seamless experience. Each level uses a new element from the real world, such as smelting iron to create a sword, then using the melee weapon to slash away at switches and obstacles. Blacksmith has been developed and published by Aruze, the game is set to release in North America on March 24, 2011. Defender of the Crown is a fast-paced, single-player, action-platformer where you must overcome your fears and defeat evil. Finding yourself trapped inside a tower, you must work your way through perils and dangers as you battle hordes of undead soldiers and evil wizards. Each level is designed to be challenging and offers a variety of tactical options. Bosses will force you to think quickly, use precise aim, and keep your cool as you are attacked at all times by a multitude of grotesque undead enemies. In addition to finding your way through the many challenges that will face you within the tower, you will also find yourself challenged in the outside world. Unlock secret entrances, solve puzzles, and find secret weapons and items that will assist you in your quest to defeat the evil King Zarkain. Defender of the Crown has been developed by Koch Media who also develop and publish a number of other acclaimed titles, including: Katamari Damacy and Wattam. The King of Dragon Pass is an all-new, fast-paced team-based action shooter from Blue Castle Games. LEGO Star Wars Battlefront is the latest and greatest in the LEGO Star Wars series. Featuring new battles and robust online support, LEGO Star Wars Battlefront will release on Xbox LIVE Arcade for the Xbox 360 video game and entertainment system from Microsoft in November for \$49.99. Gameplay in The

"Black Leather, White Bone" is a soundtrack to an immersive horror story from AMP Games. 'Black Leather, White Bone' was produced by Tony Guttillo, the composer of the 'Sister' and 'Expecte Amour' game soundtracks. Expecte Amour is a 2016 adventure game produced by AMP Games, with collaboration from French studio Caroline Productions. The game takes place on a spaceship that crashed on a faraway planet, filled with outcasts. You play as an android named Sister, who is investigating the crash site. What's in store for you is one big, terrifying secret! The story is narrated by a real human being, who gets caught in the dark, very realistic narrative. The mechanic of the game is a real-time, arcade-styled exploration and puzzle solving, where you have to keep in mind that the creatures and monsters around you are real. Together with Caroline Productions we made this soundtrack: 'Black Leather, White Bone' to play while immersed in the game. We wanted to create an immersive, scary atmosphere for the player. The mix of music is a mixture of indie sounds and future-pop, with an important part of trance. We included 22 tracks from the game, which are: 'The March' - Epic, dark music with high-energy percussion 'Midnight Hour' - Psychic, dark music with hypnotic elements 'Slice of Life' - House, futuristic disco-trance with a very big sound 'Homo Sapien' - Ambient, electronic music with a mysterious atmosphere 'Hyena' - Space, ambient and future-pop with a strong undercurrent of oriental influences 'Hanged Man' - Atmospheric, dark and atmospheric 'Hail the Head' - Synth-pop, computerized and indie-ish 'Black Leather, White Bone' - Soundtrack 'Carbonized' - Dark, haunting and epic 'Promises' - Dark, cinematic and sci-fi 'Lick of Death' - Future-pop and house with dark-haunted elements 'Shot in the Dark' - Cinematic and anthemic 'Black Leather, White Bone' - Main

? The Tiger Tank 59? Battleship MP004? name was given to a diesel electric multi role tracked amphibious armored multi purpose vehicle (APC) developed by Research Institute for Machine Building (Powidzka Mirowita Instytutego Budownictwa - Powidzka) based on the chassis of two BTRT81 amphibious troop carriers and a fifth wheel/trailer. It was developed after the failure of the Tiger Tank 58??? battleship MP006 that project was abandoned after it's prototype was displayed before the TV show "Humor show" on the channel TVN on January 12, 2012. It was conceived and developed by Electro-motor, Poland, a manufacturer of a modern electro-mechanical systems. Powidzka is a successful technology-holding company under the leadership of Mr. Andrzej Marycz, a founder and chairman of the board of directors of Electro-motor since 1996. He was technical and commercial director of Dacia Development. Mr. Marycz is founder and today's head (since 2004) of the department managing technology projects of EDC Group, a holding company. The Tiger Tank 59??? Battleship MP004? was designed and built in 2003 and???? has been produced in several military and civilian versions produced by different companies in Poland, Czech Republic, South Africa and Bangladesh?????. The first combat tests were done in 2011 near Warsaw during the Warsaw Spectracy, which were followed by the assessment tests by the US Army and Polish Army. Although the MP004? has successfully completed tests, only few in number. ?Presumed Availavity: It is a logical and interesting proposition. Original concept: Euro Truck & Bus was made for the car maker and its business. A truck company is allowed to make any truck. There is no barriers here. Engine: They have a monocoque frame with a box in the central area which is occupied by the engine. The frame has 12 half circles and the engine is in the center of the circle. They have worked out the frame and put it in the bus. Gear box: There was a study on it. They worked out the gear box and tried to make a linear transmission but they finally had to make a gear box with counter shafts because the power of the engine was too great for a linear transmission. That's it. Thank You Mr. Marycz for

Research by Markeze *et al*. [@pone.0086809-Markeze1] used statistical analyses to demonstrate that factors that impose habitat partitioning at a population level can promote diversity, but only if the partitioning factors are internal to the predator. Their research also suggests that predator-free habitat is rare and usually only found among populations of small size and high growth rate. Similarly, we found that high-predation tolerance is
