The players will take the role of Calandai, from the legendary dragon Noara. Dragons have immense power and are very majestic. You are Calandai, leader of the Sakar. Unlike others, you have not the blood of dragons but their fire. Together with your protégés, you must travel to the seven caves of the dragon and help her fight and defeat the Darkness. Half way through the day the adventurers find their torches burnt out. They try to light them up again with fire but it doesn't work. Panic is starting to seep in when a man appears, in their midst. His presence is enough to calm down the adventurers and they perceive this man as a friend. They ask him where he is from but he doesn't speak. He has a simple, friendly and honest look, and he tries to scare away the darkness. (This idea came directly from the Heroes of Eratypo Valley re-imagining.) However, he is soon slashed down by an invisible enemy, a "darks" which they barely notice. The man collapses. They feel a great sadness for the death of this friend. On behalf of the clan, they make an unexpected decision: the man has to be sacrificed in order for the clan to be protected. They ask the man where he came from but he don't know it. He was rescued by the very knights who were murdered by the darks a few hours ago. They are very excited to see him again. However, the darks have already infiltrated the clan. The adventurers must fight against it. The monsters are very bad, and we hope you will follow us on this journey to help us defeat them. The darks are stronger and stronger as the adventure progresses. There is no way you can defeat them on your own. As you progress in the adventure you will be able to learn new skills, will you use them wisely? But the warriors of the clan are not your only worry, the darks are very smart and will use the darkness to attack you from behind! Enemies will attack from side-screen, and from the roof tops (Perfect for those who enjoys gripping-combat games), not to mention the fact that the darkness will attack you from every angle. We want to provide as many ways of offensive/defensive-like combat system as possible to avoid boring combat. You might find us is very funny or strange at first, but c9d1549cdd

Comparison of the Theoretically Required and the Actual Costs of On-Site Dental Care in Iowa. The purpose of this study was to determine the costs of on-site dental care in Iowa and to compare the theoretically required number of on-site dental provider visits with the actual number of dental visits in Iowa. The 2013 Iowa Health Policy Survey (IHPS) was used to identify noninstitutionalized adults who had visited a dentist in the preceding year. From the IHPS, the Centers for Disease Control and Prevention (CDC) Health Resources and Services Administration (HRSA) Non-Institutionalized Population Estimates program provided the total adult noninstitutionalized population. HRSA's geographic area files (GAF) provided the number of dentists who were providing dental care in Iowa. All dentists in Iowa who had reported treating adults in the preceding year were included. Chi-square analysis was used to evaluate the association between having had a dental visit in the last year and two variables: whether the patient had insurance and whether the patient was a student. Logistic regression analysis was used to determine whether having an insurance plan and being a student were associated with having visited a dentist in the last year. The Burden of Oral Health Equity (BOHES) research software was used to determine the theoretically required number of on-site dental
