Gabriel Megracko.The present invention relates generally to a technique of measuring a resistance value of  
a semiconductor device using a Wheatstone bridge circuit, and more particularly to a technique which is  
effectively applicable to a high-accuracy measuring apparatus of a resistance value in a semiconductor  
device. FIG. 3 is a circuit diagram illustrating a conventional electronic resistance measuring apparatus.  
The electronic resistance measuring apparatus shown in FIG. 3 comprises a series circuit of a bridge  
circuit 1 including a pair of measuring resistances 2 and a pair of reference resistances 3, and an  
operational amplifier 4 including a positive feedback circuit. By charging/discharging the measuring  
resistances 2 and the reference resistances 3 by using a chargeable/ 570a42141b
