Hardware Assembly is a set of series of design projects from the Instructables website. The project allows you to build a variety of electronics projects, including controllers, detectors, and processors, all of which are explained through step-by-step instructions. What is the purpose of building this project? This project is intended to give you hands-on experience with building hardware projects. This means you will also learn how to do high voltage circuit design, how to drive other circuits, and how to communicate data and information between circuits. Of the two directions in the project, I can't help but like the "detector" 6a5af4ab4c
