Problem What is the file type and size of an AutoCAD drawing?

### What's New in the AutoCAD?

AutoCAD allows you to send and incorporate feedback into your designs rapidly and automatically. With AutoCAD MEP 2019, feedback from printed paper or PDFs was only available as a temporary step when exporting a drawing. If you wanted to include feedback in a design that was being reviewed by an engineering team or a design manager, you had to export the drawing to PDF first, then send it by e-mail or import it into a second drawing. As an extension of AutoCAD MEP 2019, new tools are available to incorporate feedback from paper and PDFs, and the Incorporate Feedback feature is streamlined, faster, and more accurate. Learn how you can import feedback from printed paper or PDFs and add changes to your drawings automatically. Incorporate Feedback for Comments, Reviews, and Suggestions in AutoCAD MEP (video: 1:15 min.)

Inspired by the good experiences with previous MEP 2018 features, we continued to focus on the improvements that we wanted to see for our next release. Incorporating comments, reviews, and suggestions can add another layer of feedback and help your team to collaborate more effectively, but it can also be time-consuming and a challenge to find the right person to review the changes and make the final decisions. The Incorporate Feedback feature in AutoCAD MEP 2019 allows you to import comments, reviews, and suggestions from PDFs, papers, or e-mails into a drawing. All you need is the link to the PDF, paper, or e-mail, and a subject that indicates the comment, review, or suggestion. You can do this in AutoCAD MEP 2019 directly from a Revit drawing, a print-out of the drawing, or in a PDF, paper, or e-mail. Incorporating feedback from your drawings has never been easier. Autodesk users can use a new tool in AutoCAD MEP 2019 to import comments, reviews, and suggestions from PDFs, paper, or e-mails into a drawing, for use as review and approval tools. We have added a number of new functionality and features. If you are already using the Revit plugin for AutoCAD MEP, you can take advantage of the following in this release: A new toolbar that provides quick access to commonly used tools New options to customize the look of the tools Revit 2020 integration to allow users to review changes in a Revit model, and more You can
