65544 65536 english.rtp Download -> a4c8ef0b3e This is a bug in the merger when the dex files that are being merged.. . A: The problem lies in the fact that you are actually looking for the build in Android emulator - If you are using a real Android device instead of the emulator, it would be fixed automatically by the system at the very first execution of the app. But if you run your app from Eclipse, it will not be able to detect the emulator on the first time. When the app is opened for the first time on an Android device, the developer console will show an error message stating: Your app has stopped unexpectedly. Please try again. It is because your app has no user interaction with the device, hence the emulator (which is the default user) does not work. I know it is kind of old post but even after all the efforts in the above attempt, I could not find an answer. Can someone help me in this regard? How can I get rid of this error? 1. Field of the Invention The present invention relates to a fuel injection device. 2. Description of the Related Art There is a known fuel injection device in which a floating element formed in the shape of a teardrop is held at a proper position in a direction in which the floating element is moved together with a needle by controlling a solenoid current supplied to a solenoid (see Japanese Unexamined Patent Application Publication No. 2000-289174). The known device has a plunger fitted in an elongate hole formed in a housing and is configured to inject fuel from a nozzle by driving the plunger using the solenoid. In the known device, as the plunger is pushed by a thrust member provided in the housing, the plunger urges the floating element in a direction in which the floating element is moved together with the needle. As a result, the floating element receives reaction force in a direction in which the floating element is moved, which is smaller than the thrust force given to the plunger, and accordingly, movement of the floating element causes unstable engine operation. The present invention has been made in view of the above situation and provides a fuel injection device capable of reducing unstable engine operation and reducing the size of the device. Category: Trade Trade is something that is unavoidable in the modern world. Not only do people need
