About Us BestBuy.com is the world's

largest online shopping site.Q: How to print only the first available data from the last month I am trying to query the information within an Excel spreadsheet into a data table but only the first data from the last 30 days/months as my data spreads over 5 years. I would like to basically filter down to the last 30 days. I only want the data from the middle-left, but this will be spread over 5 years. In the image above, data from the past 30 days is only from the left, and data from the past 5 years is from the mid-left all the way to the right. I know how to get the last 5 years, but do not know how to get the data from the last 30 days. I am coding in VBA. ActiveWorkbook.Connections("Data-SO").Select

```
ActiveSheet.ListObjects("Data-SO").QueryTable.CommandColumn.Text = "Customer Name"
```

```
ActiveSheet.ListObjects("Data-SO").QueryTable.CommandColumn.Visible = False
```

```
ActiveSheet.ListObjects("Data-SO").QueryTable.CommandType = xlCmdText
```

```
ActiveSheet.ListObjects("Data-SO").QueryTable.Refresh BackgroundQuery:=False
```

```
ActiveSheet.ListObjects("Data-SO").QueryTable.CommandText = "SELECT * FROM [Data-SO$] " &
```
